

# Wetrok Reshine Sport

## The premier league resin remover

There is a major problem when indoor sports facilities are used for handball matches: resin residue. Shoes and balls frequently leave dark marks all over the floor. This stubborn residue cannot be removed with regular floor cleaners (and even removing them with specific resin removers is hard work). What is more, there is always the risk that the court markings are removed along with the resin. Wetrok has developed an innovative solution to this problem:

Wetrok Reshine Sport, a specialist floor cleaner that completely removes all types of resin and other soiling without damaging the floor covering.

### Advantages

#### Effective removal of all types of resin

While conventional resin removers are often only suitable for removing a single type of adhesive, Reshine Sport scores points by removing any type of resin. Water-soluble resin and natural tree resin are removed without leaving a trace. After all, you rarely know which type of resin the other team is going to bring to the court.

#### Intense cleaning with top results

Reshine Sport can even take on dried resin stains, against which other adhesive removers are powerless. The highly effective resin remover is suitable for maintenance as well as intensive cleaning.

#### Retains floor coverings & court markings

High-performance resin cleaners are reliable when it comes to removing residue, however, they often damage the court markings or the floor covering. Only one thing is removed when you use Reshine Sport as a cleaner: the resin.

#### Suitable beyond the court

After a handball match, you will often find resin residue also on the walls and in the changing rooms. Reshine Sport will help here, too. By the way, Reshine Sport is also suitable for removing black marks left by shoe soles.

#### Flexible types of use

Reshine Sport is very versatile: single-step scrubber drying (mild soiling), two-step scrubber drying (strong soiling), or it can also be applied with a mop or sprayed on as pre-treatment, followed by cleaning with the scrubber-dryer (strong soiling).

### Customer Opinion

## Happy facility managers, happy court users

«Resin residue was a huge problem in our facility for eight years. That's been a thing of the past since we started using Wetrok Reshine Sport. You could almost say that the court floor has experienced a revival. For the first time ever, we are now able to completely remove ALL resin residue.»

## Wetrok Reshine Sport

### The premier league resin remover

#### Package

1 x 10 litres  
Art. No. 12280

3 x 5 litres  
Art. No. 12281

Spray bottle 0.5 litre (without head)  
Art. No. 12282

#### Properties

- A powerful product for maintenance and intensive cleaning
- Removes all types of resin (water-soluble and natural)
- Retains court markings
- DIN 18032 certified (tread safety)
- Developed specifically for removing handball adhesives in sports facilities
- Alkaline
- Lightly scented
- Safe use (no hazardous material)

#### pH value

11 (concentrate)

#### Areas of application

- Indoor sports facilities
- Gymnasiums
- Indoor handball courts
- Changing rooms
- Equipment storage rooms

#### Application

- Direct scrubber drying (single-step process)
- Indirect scrubber drying (two-step process)

#### Important advice

- Keep the floor wet throughout the contact time
- Suitable for all water-resistant, non-coated floor coverings
