# Wetrok KeyCar: A personal touch meets total protection

Do you need a cleaning cart that combines strict security requirements with a quality design? Then the Wetrok KeyCar is the ideal solution for your facility. The entire cleaning system can be locked completely with a single key. This keeps all cleaning materials, especially chemicals, out of the hands of unauthorised individuals. The KeyCar is visually appealing thanks to a freely customisable exterior design: Your personally chosen theme will attract the attention of passers-by and turn the cart into a personalised companion.

## Four features to simplify your cleaning processes:

### Dusting wipes within reach in seconds

The Masslinn roll holder keeps your dusting wipes ready to use at all times. The perforated roll on the holder makes it easy to separate the right number of cloths from the roll depending on the working width.

### Hygienic cleaning with colour coding

The upper level of the KeyCar offers space for an 8-litre bucket. Depending on the model and configuration, anywhere from two to four colours can be chosen. The KeyCar facilitates hygienic surface cleaning with your preferred application.

### Ergonomic laundry transport

When the laundry box is full, it can effortlessly be rolled to the laundry facilities. This is possible thanks to small wheels and a height-adjustable handle that turn the laundry box into a small trolley for transport.

### Innovative dosage system

It's truly as simple as pouring in the cleaning solution, setting the desired quantity of liquid per mop, initiating dosing with the lever and placing the dry mop directly against the wet mopping unit in the bucket. Let the liquid soak in for two minutes—done!

### Your own personal design

A cleaning cart can be a functional object and an advertising space at the same time. Display your logo, a motivational picture or a message - the choice is yours. Choose one of 20 themes or have the KeyCar printed with your own individual theme. You can also add your logo to any theme.

### Safety for passers-by

The entire KeyCar cleaning system can be locked completely with a single key. This prevents customers, children and other passers-by from accessing the chemical cleaning products.

### Tailored to your needs

The KeyCar is available in the sizes S, M and L. Pre-configured carts are available in every size—these can be ordered directly or used as an inspiration for a customised design. The KeyCar offers you the freedom of choice without forcing you to choose.

## Wetrok KeyCar—perfect for highly demanding properties

If you need a cleaning cart that is not only functional but also secure and visually appealing, KeyCar is the perfect choice. Cleaning personnel in the following types of properties will be especially glad to replace their traditional cleaning carts with this rolling companion:

- **Healthcare institutions, such as hospitals and residential care facilities**
- **Educational institutions for children, such as schools and kindergartens**
- **Publicly accessible buildings, such as shopping centres or shopping arcades in train stations and airports**

While it is essential in hospitals and residential care facilities to prevent unauthorised individuals from coming into contact with chemical cleaning products, administrators of public buildings are also happy to have a cleaning cart with a customisable space for advertising or information.

However, the KeyCar can also be a real chameleon: with a neutral layout, it will be nearly invisible as it makes its way through the building.
