

Wetrok surface cleaner  
Bubbling over with the joy of cleaning

# Surface cleaning – effervescent cleaning power

The surfaces in a building are comparable to the various skin zones of the human body. Some are smooth or coarse, others have fine or large pores and then there are those that are particularly sensitive or have specific characteristics. Just like human skin, these surfaces need the right care. Key criteria for selecting the right surface cleaner are the material, exposure and the degree of contamination. Furniture, machinery, food preparation areas, doors, window frames, closet fronts or sanitary facilities: Each application poses specific cleaning challenges – in terms of hygiene and aesthetics.

## Brilliant innovation on the surface

Wetrok has the world of surface cleaning frothing at the mouth with two new products. In response to the ever increasing demands of cleaning professionals, Wetrok has developed two new surface cleaners that cover the two basic requirements of surface cleaning: pure cleaning power for rugged surfaces and safety for all-purpose cleaning.

### Wetrok Purasurf

**Non-hazardous, but powerful:  
the all-purpose cleaner with added safety**

Now you can clean all kinds of surfaces quickly, gently and easily.

Wetrok Purasurf offers top cleaning performance:

- 1. Easy on materials:**  
No risk of joint discolourations.
- 2. Unscented:**  
Perfect for use in food preparation areas and allergen-free.
- 3. Non-hazardous:**  
Safe in every way.

### Wetrok Powersurf

**Ready-to-use and foamable:  
the extra strong deep-cleaner**

Wetrok Powersurf is a high-performance all-purpose cleaner.

Wetrok Powersurf shines with three extras:

- 1. Extra strong cleaning performance:**  
The spot cleaning function removes stubborn dirt particles and residues with ease.
- 2. Easy-to-clean:**  
The Easy-to-Clean effect is extra efficient and prevents dirt particles taking hold.
- 3. Easy to use:**  
The ready-to-use solution saves time and reduces personnel costs.

#### Double action polymer barrier

The polymer molecules contained in Wetrok Powersurf create an invisible barrier between the surface and dirt particles. Almost like an intangible film that cannot be seen or felt. As a result, significantly less dirt will attach to the surface.

#### The effect:

- Surfaces stay clean for longer.
- Dirt is removed more easily, which protects the surface finish.

# The magnificent seven for cleanliness and shine

With the additions of Powersurf and Purasurf, the revised Wetrok range of surface cleaners now includes seven products for various applications that perfectly complement each other. Each product is designed to achieve excellent cleaning results in its specific area of application quickly and thoroughly. And all that with our tried and tested Wetrok cleaning methods, especially the highly economical and effective foam cleaning method. It produces an unsurpassed cleaning effect, in particular on porous and oil-contaminated surfaces.

## Wetrok Purasurf

### One for all

Your first choice if you want to get surfaces clean safely and with ease. The intensive cleaning concentrate is based on a bespoke composite of surfactants and innovative solvents. It guarantees optimised cleaning performance and maximised application safety.

Its strengths – your benefit:

- Dries quickly and without leaving streaks
- Foams at 10% solution
- Classified allergen-free
- Unscented
- No colourants
- Non-hazardous

## Wetrok Alcosal

### The classic with the fragrance of the Provence

Your perfect choice if you want to combine impeccable cleaning results with a subtle fragrance. The alcohol-based, tried and tested all-purpose cleaner shines with an improved foam cleaning performance and also handles oil-based soiling with ease.

Its strengths – your benefit:

- Dries quickly and without leaving streaks
- Foams at 10% solution
- Long-lasting lavender fragrance
- Blue colour

**New formulation!**

## Wetrok Powersurf

### Unrivalled strength

The perfect choice if you need to deal with stubborn surface contamination quickly and completely. The composition of surfactants and innovative, high-performance solvents achieves excellent cleaning results with minimum effort.

Its strengths – your benefit:

- Easy-to-Clean function with barrier effect
- Spot cleaning function
- Dries quickly and without leaving streaks
- Foamable
- Ready for use

## Wetrok Brillant

### Shiny polish

Your perfect choice for brilliant results on glass, mirrors and flatscreen TVs. Wetrok Brillant removes oil and grease residue and prevents mirrors misting up. The anti-static effect repels dust, keeping the cleaned surface shiny for longer.

Its strengths – your benefit:

- Anti-static and anti-misting effect
- **New:** Tested by the SGS Institut Fresenius and recommended for the cleaning of flatscreens

**Tip:** The problem solver **Minatol Top Glass forte** works miracles on moderately to severely contaminated plastic, glass and mirror surfaces!

## Wetrok Reodor / Reodor citro

### Refreshingly powerful

Your perfect choice if you want clean surfaces and a fresh, long-lasting fragrance. The newly optimised formulation for this popular all-purpose cleaner guarantees excellent foam cleaning performance that makes short work of general dirt and grime on surfaces.

Its strengths – your benefit:

- Solvent-free
- Dries quickly and without leaving streaks
- Two long-lasting fragrances to choose from
- **New:** foams at 10% solution

**Tip:** The alternating use of Wetrok Reodor and Wetrok Reodor citro will guarantee a long-lasting fragrance and underlines the feeling of cleanliness.

## Wetrok Topclean

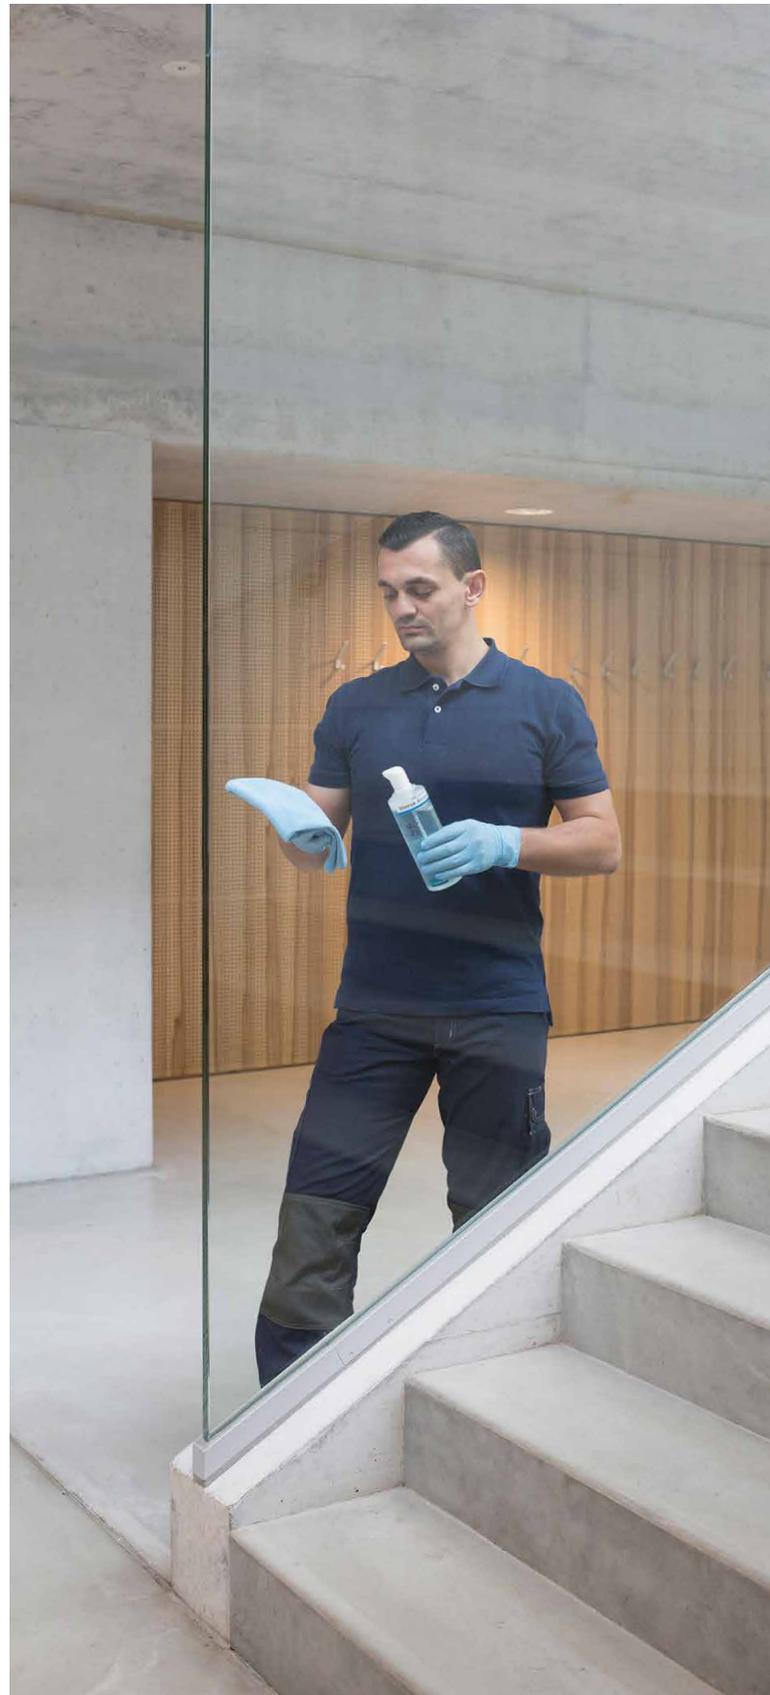

### Top against dirt spots

Your perfect choice if you want to remove spots on solvent-resistant surfaces quickly. The highly effective spot cleaner offers targeted and intensive cleaning results. Exactly where you want it.

Its strengths – your benefit:

- Easy to handle
- Lightly perfumed
- Can be used universally

**Tip:** Apply undiluted to a dry cloth or directly onto the surface to be cleaned. Wipe the surface and rub it dry.

# Foam cleaning: highly effective in every aspect

Surface cleaning is synonymous with value retention and image building. Clean, shiny and fragrant surfaces in the workplace, shopping areas, hospitals, nursing homes and public buildings create an atmosphere of well-being. And they reflect on the performance of the entire facility service team. It is something to take pride in. Because there is no second chance for a first impression.

## Wetrok foam cleaning: superior in every aspect

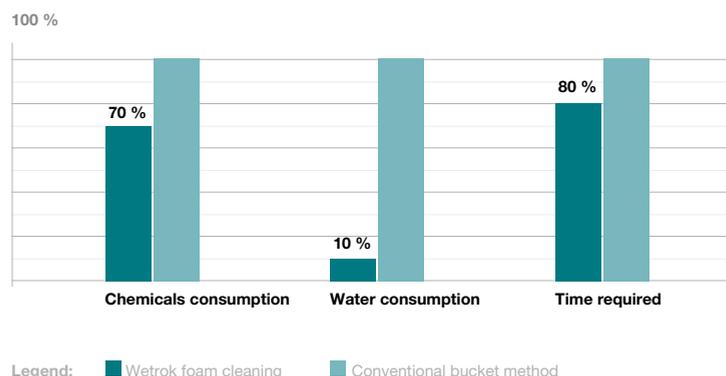

Save time and money – without skimping on cleaning quality ...  
But how?

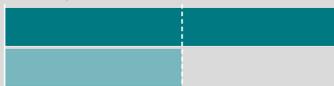

Wetrok takes care of this seeming contradiction with the ingenious foam cleaning method. The Wetrok foam bottle replaces the conventional spray bottle to revolutionise surface cleaning:

- **Precise dosage and easy handling:**  
Comply with the dosing instructions on the bottle. Dilute the cleaning solution with water. Apply the foam to the surface using a microfibre cloth.
- **No more wasted water and chemicals:**  
Not a drop of the cleaning solution is wasted in foam form. Because Wetrok cares about tomorrow's environment.
- **Safety for cleaning personnel:**  
No chemicals are sprayed into the air to be inhaled by personnel. An all-round safe work environment is guaranteed.
- **Targeted application instead of wasteful spraying:**  
The foam bottle makes uncontrolled spraying obsolete. Apply the foam cross-wise for a completely uniform spread across the entire surface during wiping. Use a microfibre cloth. The function of the cloth enhances the performance of the cleaning solution. An unbeatable duo.

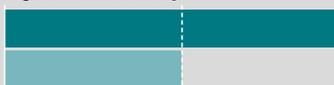

## Save valuable resources

### Cleaning results

### Ergonomics and safety

## Keeps dirt and physical fatigue in check

**Improved effect of the special surfactants in the foamed cleaning solution:** The surfactants are not absorbed by porous surfaces, which prevents accelerated resoiling. They ensure optimised wetting characteristics, as surface tension is reduced. Additionally, they are optimised to efficiently emulsify oily residues.

**No unnecessary physical strain:** No more lugging around of heavy water buckets, no repeated wringing of cleaning cloths. Instead, cleaning personnel will progress much faster and show less signs of fatigue.
