

Wetrok Quick System

## Wetrok Quick System: The single-use system for all situations

Save time and money in maintenance cleaning while increasing hygiene and ergonomics at the same time? The clever Wetrok Quick System makes it possible with its innovative single-use products!

#### **Advantages**

- saves time Ready for use immediately, short set-up times, no handling of laundry
- saves money Minimal use of water and cleaning agents, no washing expenses
- hygienic No germ transmission and dust raising, since the used cloths are immediately disposed of
- ergonomic No carrying of water buckets, no wringing out of cleaning cloths
- simple Easy instructions, easy handling
- quick Floors can be walked on again immediately
- safe No dosage errors, since cleaning cloths are pre-dampened

### The Wetrok Quick System brings the greatest benefits here

- Properties with small- to medium-sized areas, where minor but continuous quantities of dirt (loose and slightly adhesive dirt) appear, that must be removed quickly and regularly.
- Areas where an impeccable hygienic result is important with the use of dust-binding cleaning methods\*
- Properties with representative use: Quick and simple removal of selective soiling
- No possibility to process laundry and/or no water access in the vicinity
- Simple, cost-saving and time-saving handling for cleaning during operations, especially suited for personnel unaccustomed to cleaning such as, e.g. office and sales personnel
  - \* Water residue, such as e.g. occurs during full wet-mopping, fosters the growth of micro-organisms

### Save time and money!

Before introducing or switching to cleaning with single-use products, it is essential to consider and assess the various influencing factors at the site. In this way, the advantages of the Wetrok Quick System can be fully exploited and the optimum cleaning system can be evaluated for the business.

The following influencing factors are to be taken into consideration at the site:

- Operational circumstances (washing machine/launderette available, type of building, type of surfaces to be cleaned, storage capacity, logistics etc.)
- Philosophy of the business
- Internal regulations
- Hygiene requirements
- Type of soiling

In order to make an accurate cost comparison between «multiuse – single-use», the following costs of the work processes as well as the infrastructure must be taken into consideration and added to the individual product prices:

- Supply and disposal lines
- Own or third-party launderette
- Handling
- Loss / Wear and tear
- Storage costs
- Disposal

When switching from multi-use to single-use products, three steps are eliminated:

- Measuring doses of cleaning solution
- Washing and drying
- Folding and putting away

## At a glance: The single-use system for hospitals...

Wetrok SmartCar Quick System Hopital, Item No. 80.765: Lots of room for single-use products and other materials needed, such as hand and window cleaning tools, pads, paper, litter bags etc. Large bag holder with lid and integrated, lockable material storage case.

- 1 Wetrok Variwet pole, Item No. 80.156 with Balit Varifix 380, Item No. 80.535 Aluminium pole with 900 ml pressure bottle and spray nozzle for spray mopping and for spot-cleaning with the new micro-Velcro sole 380, Item No. 82.613 and Quick Mop 380.
- Wetrok Balit Varifix 560, Item No. 80.541 with telescopic pole, Item No. 81.413 Device for dust-binding mopping with Lamiwell sole 560, Item No. 82.609 or pad sole 560, Item No. 82.611.
- 3 Wetrok Masslinn and Masslinn 2000 Available in various colours and sizes, e.g. Masslinn 2000 roll, Item No. 82.525 for dust-binding mopping or for dusting off furnishings.
- 4 Wetrok Roll holder m 2000 Flexi, Item No. 81.695

#### and the office!

Wetrok SmartCar Quick System Office, Item No. 80.760: Space for vacuum cleaner and tube clip for securing, devices and single-use products, bag holder for disposing of litter.

- 5 Wetrok Quick Mop 380, Item No.82.070 Thin single-use mop made of 100% polyester with large capacity for absorbing dirt, for use with Wetrok Variwet.
- 6 Poly duster, Item No. 80.278 with telescopic pole, Item No. 80.279 For dusting off cupboards, pictures, lighting fixtures etc. The electrostatic single-use cover Pro Duster, Item No. 82.535 absorbs the dust and protects the poly duster.
- 7 Wetrok Dustpan with brush, Item No. 80.290
- 8 Single-use gloves, Item No. 82.586 (S), 82.587 (M), 82.588 (L), 82.589 (XL) Boxes with 100 latex gloves each.
- 9 Wetrok Quick&Clean, Item. No. 82.478 (20 cloths) or Item No. 82.480 (50 cloths) Cloths dampened with an alcohol cleaning agent for cleaning all washable surfaces, particularly in the office area.
- 9 Wetrok Quick&Clean Aqua, Item No. 82.476 (20 cloths) Cloths dampened with all-purpose cleaner for cleaning all washable surfaces, particularly in the hospital area.
- 9 Wetrok Quick&Clean San, Item No. 82.470 (20 cloths) Cloths dampened with a slightly acidic cleaning product for cleaning all washable surfaces, particularly in the sanitation area.

Masslinn cloth Dust mopping (damp mopping) is the most efficient cleaning method for hard and elastic floor coverings (smooth and lightly structured). Loose soiling – and thus over 80 per cent of all soiling – is removed without any effort. In addition to cleanliness and hygiene, dusting also serves to maintain value since surface-damaging materials such as sand and small stones

are removed. The appropriate Masslinn cloth is selected depending on the size of

the room and its location.

1 Dust mopping with single-use Wetrok

6

2 Damp dusting with Wetrok

Quick&Clean The Wetrok Quick&Clean single-use cloths are suited for the removal of light soiling on all waterproof surfaces. Since the cloths are already pre-dampened with a cleaning solution, time-consuming preparations are eliminated (preparing water, measuring dosage of cleaning agent etc.) as well as the cost-intensive handling of dirty and clean washing. The appropriate Quick&Clean cloth is selected depending on the type of soiling and the application area. In the sanitation field e.g., Wetrok Quick&Clean San is used; even light lime residues can be removed with it.

3 Dry dusting with Masslinn Dusty or ProDuster The Wetrok Masslinn Dusty single-use cloth is well suited for dusting off surfaces of all types, as it perfectly absorbs the dust through the oil-impregnated structure. Dusting off furnishings above shoulder height (pictures, lamps etc.) is made considerably easier through the use of a poly duster with the ProDuster cover which absorbs the dust through static charging. If the cover is saturated with grime, it is simply thrown away and replaced by a new one - thus dust is no longer dispersed by shaking out the duster.

4

4 Wet mopping with Wetrok Variwet and Wetrok Quick Mop 380 After dust mopping, the adhering dirt is removed through full-surface or spot wet mopping with the Wetrok Quick Mop 380. Thanks to the washable micro-Velcro sole, use is also possible in hygienically sensitive areas. Here the mop is changed and disposed of after each room.
