## Wetrok Karpfrost

Freeze spray for easy removal of chewing gum and elastomers

# Wetrok Karpfrost

**pH value (Concentrate):** -

**Important ingredients:**

Solvents, Propellant

**Recommended dosage:**

Undiluted

METHODS  
finder

**APPLICATION**

- Freeze spray for removing chewing gum and elastomers
- For cleaning temperature shock resistant surfaces (textiles and hard floor coverings)

**PROPERTIES**

- Strong cooling effect
- Not water-soluble
- Colourless
- Flammable

**GOOD TO KNOW**

- Also available as Karopthek kit

**PLEASE NOTE**

- Shake well before use

**RECOMMENDED APPLICATION METHOD**

**Remove chewing gum**

Spray the chewing gum with freeze spray. Wait until the chewing gum is white (which means it is frozen hard). Then pound the chewing gum with a plastic spatula and scrape it off. Stripped off particles are vacuumed off at the same time (dry vacuuming). Repeat if necessary.

**STORAGE**

Store in original container at 15 to 25°C. The container is pressurised. Protect from direct sunlight and temperatures over 50°C. Even after use, do not open using force and do not burn.

*Durability (unopened): 24 Month*

Wetrok AG shall have no liability whatsoever for damage caused by incorrect use. Observe special cleaning and care instructions from the floor covering manufacturer.
