

Push sweepers and vacuum sweepers
For clean surfaces – indoors and outdoors

Wetrok sweepers: two effortless push sweepers

With these push sweepers, smaller to medium-sized areas can be removed of all kinds of dirt in no time at all. The double sweeping system with two disc brushes and sweeping roller makes it possible to remove dirt from two cleaning cycles in just one pass. From leaves and biscuit remains to aluminium cans. The Turbo Sweep 77 Plus and Master Sweep 97 Plus models not only specialise in outdoor surfaces, they also leave storage rooms and industrial areas immaculately clean.

Turbo Sweep 77 Plus

- Double dirt removal through disc brush and sweeping roller
- Softgrip push handle: ergonomic and non-slip
- Robust support wheels make uneven surfaces negotiable

Battery-powered
brush drive

Master Sweep 97 Plus

- Double dirt removal through disc brush and sweeping roller
- Softgrip push handle: ergonomic and non-slip
- Robust support wheels make uneven surfaces negotiable
- Large battery for long battery life

Clever double disc brush principle

Two counter-rotating disc brushes pick up the dirt over the entire rotating sweeping width and push it to the sweeping roller behind. The roller takes over and transports it into the large container. At the same time, the sweeping roller also picks up fine dirt.

Speedmatic Twister: the easy-to-manoeuvre push vacuum sweeper

The Speedmatic Twister is ideal for sweeping medium-sized areas. It is agile and compact, yet sweeps over a considerable width of 78 cm. The battery makes it quiet and emission-free. It is therefore also ideal for closed rooms and halls. But the all-round talent can do even more: Equipped with the optional carpet set, it reveals the ability to also clean textile floor coverings.

Speedmatic Twister

- Easy to maneuver and use in confined spaces
- Quiet battery operation and integrated charger
- Ideal for closed rooms (emission-free)

- Service-friendly and robust
- Washable polyester filter for wet debris
- Carpet cleaning option

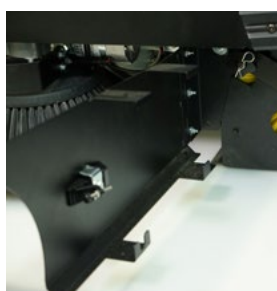

Carpet cleaning made easy

Customers who opt for the Speedmatic Twister no longer need a separate carpet cleaning unit. Converted with the optional carpet brushes, this machine cleans carpets as efficiently and effectively as it does hard outdoor flooring.

Speedmatic Tornado Pro: versatile ride-on vacuum sweeper

The Speedmatic Tornado Pro has swept through the world of vacuum sweepers like a whirlwind. Its special features: it stands out as an all-round talent for indoor and outdoor use – with 100% compelling results, every time. The choice is yours: do you prefer the battery-powered or the fuel-operated version?

Speedmatic Tornado Pro

Tool-free sweeping roller replacement

Put away your toolbox: the sweeping rollers are replaced completely without tools in just a few seconds.

Power broom for optimal results

The optimised side brushes remove dirt in every last nook and cranny – and in record time! High-maintenance drive belts have made way for modern electric motors.

Special equipment for ergonomic work

Every element (seat, foot pedal, etc.) has been ergonomically designed and angled just right for comfort at work. For optimised convenience: on the battery-powered version, the operating display is integrated directly in the steering wheel.

Experience the Speedmatic Tornado Pro in action!

Choose between the battery-powered and fuel-operated models

The type of drive on the Tornado is your choice. Decide between a high-performance fuel-powered engine for outdoor areas or a quiet battery-driven engine for indoor areas. Whether it is in flat parking garages, steep outdoor car parks or high-traffic warehouses – you are guaranteed to get ahead.

Battery-powered version with power-saving feature:

When the machine is stationary, the brushes stop after three seconds. This feature protects the floor and reduces brush wear.

Speedmatic Cyclone: the high-performance ride-on vacuum sweeper for large areas

Are you looking for a high-performance vacuum sweeper for outdoor use, which covers a lot of ground in a short amount of time? Then the Speedmatic Cyclone is the perfect choice for you. Lots of litter, large surface areas and heavy soiling – it's all in the comfort zone of this powerful machine. You will barely recognise your outdoor surface after cleaning it with this powerhouse!

Speedmatic Cyclone

High area performance for speedy work

The high-performance diesel engine and generous working width ensure that cleaning work is done and dusted in no time.

Reach for the sky – even on steep inclines

When cleaning outdoors, hardly any surface will be completely flat. That is why the Cyclone has extra power for ramps and inclines.

Damp material? No problem!

Wet leaves are omnipresent in the autumn. No problem for the Cyclone: the polyester filter is washable, so even damp soiling won't result in extra maintenance costs.

Ergonomic top-loader emptying

When the Speedmatic Cyclone's large dirt container is full, empty it without the use of muscle power. Simply actuate the lever, and the dirt container is lifted hydraulically. You can then tip the contents effortlessly into the waste container.
