Wetrok Reofom

Alkaline foam cleaner

Recommended dosage (in cold water):

Maintenance cleaning
0.3 l – 0.5 l / 10 l

Foaming by hand
Min. 2 l/10 l

Benefits:

Alkaline foam cleaner for dealing with fats and proteins in wet rooms / wellness zones.

Excellent effectiveness on larger vertical surfaces.

Also suitable for foaming by hand.

Application:

For maintenance cleaning of washable and alkali-resistant surfaces (sanitary porcelain, fittings, ceramic tiles, bathrooms, showers, washrooms and WCs, etc.).

Please note:

Wetrok Reofom is not suitable for alkali-sensitive surfaces (aluminium, etc.). The exterior of the sanitary fitting must not be warm when cleaning.

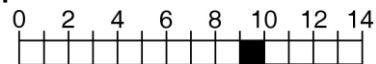

Properties:

Slightly alkaline

High-lather

Lightly perfumed

pH value of concentrate:

Important ingredients:

Surfactants, solvents, fragrance, preservatives

Storage/shelf life:

Store in original container in a cool, well-ventilated place.

Protect from frost. Keep container closed when not in use.

Shelf life (unopened): 24 months.

Recommended application methods:

Foam cleaning

Moisten surface to be cleaned with water thoroughly before use. Then apply the cleaning solution as a foam using a foaming device (using either a high or low-pressure device) starting at the bottom and working to the top. Work the cleaning solution in using an edge cleaning tool and white pad or Microsol fibre pad. Then rinse with water.
