work process: select one work stage from each number

cleaning method	* recommendations chemical products	dosage	* recommendations pad / brush / mop / cloth	recommendations machine / tool	comments
1  dry vacuum cleaning			Dust roller nozzle Neverclog filter without ring Filter bag with ring	Twinvac / Duovac / Silento /	large areas: sweeping
2  dusting damp mopping			V Masslinn 2000/Floorwit white Multi squeegee/	Balit Varifix/ Balit/	
cleaning without maintenance care product (if coating follows)					
3  wet mopping direct method	Ecofloor V Reshine V Antiwax forte	0.5 - 1% 3 - 5% 2 - 5%	Micro-Mop Top/ Microsol mop/	Socar / Drewell	
3  scrubber drying direct method	Ecofloor V Antiwax forte V Reshine	0.5 - 1% 2 - 5% 3 - 5%	● Pad red/ V ● Pad blue/	Duomatic / Laser Mambo / Samba Sprinter / iMatic	
3  wet scrubbing and wet vacuuming	Antiwax forte Remat	2 - 5% 1 - 5%	● Pad blue/ V ● Pad green/	Monomatic LS / Watertank Duovac /	heavily soiled  
cleaning with maintenance care (first protective treatment with same product as in maintenance cleaning)					
4  wet mopping direct method	Redur	3%	Flat mop/ Micro-Mop Top/	Socar / Drewell	
4  scrubber drying direct method	Redur	3%	● Pad red/	Duomatic / Laser Mambo / Samba Sprinter / iMatic	
4  spray cleaning full spray	Polyspray Elspray	100% 100%	● Pad red/ P ● Pad yellow/	Monomatic DS / Spray unit	after polishing 

* basic treatment / structure: B: coated / C: waxed / D: oiled / E: sealed / F: untreated / G: maintenance care product / P: polishing / S: structured / V: heavily soiled

important: When spray cleaning, you should change your pad often

* basic treatment / structure: B: coated / C: waxed / D: oiled / E: sealed / F: untreated / G: maintenance care product / P: polishing / S: structured / V: heavily soiled

important:

change pad often

Do not coat floors with PUR coating provided in the factory

Use a coin or a key to do a scratch test, to check if all the protective coating has been removed.

When white abrasion occurs, carry out a full clean to remove all the protective coating

For initial cleaning after basic cleaning, see "initial cleaning".

important:

if needed

before protective treatment: the floor must be perfectly stripped, thoroughly rinsed and completely dry!

Let dry protection treatment completely between the layers and before use

Process treatment of protection: see description of method

For initial cleaning with maintenance cleaner after protective treatment, see "initial cleaning".

Information about the flooring

Wetrok AG cannot accept any liability for damages due to improper use.
For security information, see the safety data sheet at www.wetrok.ch.
Wear protection: gloves, safety goggles, work clothes
Follow the information and remarks on the label, product data sheet and material safety data sheet.
The product data sheet describes the product and gives information about its application, storage. See www.wetrok.ch
The recommended colours of pad and brushes consist to the actual wWetrok product range
Follow the special cleaning and care instructions of the floor manufacturer
The cleaning and care instructions are recommendations and suggestions and apply to floorings in object quality.

Rubber granulate floor coverings are sensitive to strong alkalines such as soft soap and basic cleaners. Colour change: material damage!

Rubber granulate floor coverings are sensitive to certain solvents such as ketone and ester.

Fat-soluble colorants such as shoe polish or asphalt can penetrate into rubber granulate floor coverings: diffusion

Polyurethane surfaces are relatively insensitive to abrasive pads and brushes.

Polyurethane surfaces are insensitive to cigarette burns, glowing cigarettes and deposit marks.

A polyurethane rubber granulate system is a synthetic elastic covering made from rubber granulates and a binder, compacted and smoothed, with a polyurethane use-surface.
Polyurethane rubber granulate systems are applied in a seamless manner.

Distinguishing feature: fire assay with a glowing hot needle in an inconspicuous place: needle does not penetrate, no acrid smell, no crater formation.

Remove loose dirt before every cleaning, damp mop smooth floors and vacuum structured floors.
Cleaning agents and surface treatments may alter the appearance and properties of a floor's surface.
Test on an inconspicuous spot to find which product is suitable for your requirements.
Test beforehand on an inconspicuous spot to see if the cleaning agent or surface treatment damages the floor.
Dirt-trapping zones, incl. dirt-trapping mats (Wetrok Gardamat) in the entrance, at least 7m long, greatly reduce the amount of dirt tracked into the building.

If you have any questions, please don't hesitate to contact us.
