

Monovac Freedom: five features for unlimited freedom

- Unparalleled operating time of 45 minutes when fully charged
- Touch'n'Clean: Stop & Go at the touch of the handle
- Cable-free: the risk of tripping over tangled cables is a thing of the past
- Extremely quiet, making it ideal for noise-sensitive environments
- Hygienic thanks to the optional HEPA 13 filter

Endless power: Owing to its state-of-the-art 320-watt suction motor, the Monovac Freedom is currently the most powerful product in the battery-powered vacuum cleaner category.

Lithium power & Touch'n'Clean: start, vacuum, stop

How it works

- Touch the handle and the vacuum cleaner turns on.
- Let go of the handle and it turns off.

In other words: The vacuum cleaner is only on when it is actively being used. The Freedom's actual operating period is therefore significantly longer than conventional battery-powered vacuum cleaners. What's more, the tool's intuitive and ergonomic operation makes everyday cleaning that little bit easier. An enjoyable technological leap!

Up to 30% less energy consumption

As part of the daily routine it is quite common to leave vacuum cleaners running during short interruptions of work. The Freedom prevents this waste of energy with the Touch'n'Clean function in its handle: The motor is only on when the vacuum cleaner is actually in use. This reduces power consumption by up to 30% and extends the operating period accordingly. The benefits are both ecological and economical.

Stand-by function

If the vacuum cleaner is not moved for five minutes, it will automatically go into sleep mode. A slight motion is all it takes to get the Freedom working again – ready to pick up where it left off. The power supply is regulated by the new smart-battery management system to guarantee maximum performance for the duration of the vacuum cleaner's service life. Touch'n'Clean guarantees flexibility and ensures that the only way is forwards!

Technical Data

Monovac

Model: Freedom
Art. no.: 40770

Basic Version

Combination nozzle 30
Telescopic suction tube M/D
Suction hose M/D compl.
Pre-filter Monovac/Durovac
Waste air filter Monovac
Micro-fleece bag Monovac/Durovac

Joint nozzle M/D
Upholstery nozzle M/D
LED charge indicator
Charger
Handle Touch'n'Clean

Technical Data

Capacity	3 l
Weight	8.0 kg
Total height	38 cm
Total length	40 cm
Total width	32 cm
Vacuum	120 mbar
Airflow rate	30.7 l/s
Vacuum motor output	320 W
Sound power level (EN ISO 3741)	65 dB(A)
Sound pressure level (EN ISO 3741)	53 dB(A)
Rated voltage	36 V
Lithium battery	36 V / 8.8 Ah
Battery life	¾ h
Charging time for full charge	4 ½ h

Nozzles

41600	Combination nozzle 30
41601	Combination nozzle 50
41602	Basic Combination nozzle
41604	Nozzle with rolls 30
41605	Nozzle with rolls 36
41616	Joint nozzle M/D
41617	Upholstery nozzle M/D
41618	Brush nozzle M/D
41619	Radiator nozzle M/D
41620	Universal brush nozzle M/D
41625	Nozzle set 35
41630	Connector 35/37
41631	Connector 37/35

Tubes and hoses

41636	Tube M/D 50 cm
41635	Tube extension 25 cm
41637	Telescopic suction tube M/D
41640	Suction hose M/D compl.
41642	Antistatic hose M/D compl.

Filter

42083	Pre-filter M/D
42084	Pre-filter washable M/D
42086	HEPA 13 filter Monovac
42087	Waste air filter Monovac

Filter bags

42613	Fleece bag M/D 6 litres (10 pc.)
-------	----------------------------------

Accessories

36922	Charger Freedom
42031	Scented platelets (10 pc.)

Monovac Freedom
0% cable. 100% power. 100% freedom.

Monovac Freedom: it just keeps going

If you like broadening your horizons and don't like limitations, then it's time for you to discover a new world of dry vacuum cleaning with the cable-free Monovac Freedom. A world in which flexibility is everything, the working radius is boundless and suction power is unlimited. With its Touch'n'Clean function, the Freedom responds to the slightest touch. Touch the handle and the vacuum cleaner turns on. Let go of the handle and it turns off. Ready to go: cable-free but with an extra boost of suction power. Limitations imposed by cable length are a thing of the past - broaden your horizons!

Monovac Freedom: unlimited performance

The Freedom features a perfect blend of excellent area performance and a long battery life. The integrated battery allows for improved performance - the ultimate combination of power and stamina. With an operating period of 45 minutes when fully charged, the Monovac Freedom is unparalleled in the world of battery-powered vacuum cleaners. Even large areas can be swiftly cleaned of dust. However, there is more to the machine than just its power: The Monovac Freedom's minimal noise levels ensure that it is not disruptive, even in noise-sensitive environments.

The vacuum cleaner features an enormous area performance and a high degree of cleaning efficiency. There are no limits to the Monovac Freedom's uses. It knows no obstacles and has no need for power sockets.

Lithium iron phosphate battery: a battery developed by Wetrok

The Freedom's integrated lithium iron phosphate battery was developed by Wetrok exclusively for this vacuum cleaner. The external charger allows for quick and easy recharging. And whether you charge the battery or fully, the lithium iron phosphate battery is designed for more than 2,000 full charges. The Freedom has an integrated battery, this means that damaged or lost batteries are a thing of the past.

Monovac Freedom: the insiders' tip for the healthcare sector

Quiet, sustainable cleaning - that is what is demanded of cleaning tools in the healthcare sector. And these are the strengths of the Monovac Freedom. The vacuum cleaner is the ideal cleaning device for hygiene or noise-sensitive environments. It is so quiet that even individuals in the direct vicinity of the vacuum cleaner are not disturbed by its operating noise. And when equipped with the HEPA 13 filter, dust and bacteria are filtered even more finely.

Touch-sensitive operation: automatic «Touch'n'Clean» handle

Vacuuming performance without idle operation: Touching the automatic handle is all it takes to turn on the Monovac Freedom. When the automatic handle is released, the motor shuts off automatically. Your advantages: no unnecessary power consumption and vacuuming noise.

No cables, no trip hazards: vacuuming has never been this safe

Tangled cables? Nope. The battery-powered vacuum cleaner guarantees flexibility and manoeuvrability in premises with a lot of furniture. It performs brilliantly even in areas with numerous corners and obstacles such as chairs and thresholds. Another advantage: with a cable-free vacuum cleaner, the risk of accidents caused by tripping is kept to a minimum.

Large-surface pre-filter: clean exhaust guaranteed

The 3,200 cm² pre-filter (class M) retains dust and allows for air to pass through unhindered. This protects the motor from dust and guarantees a longer service life. Clean exhaust air is channelled upwards into the room so that dust on the floor is not stirred.

«Defined Air Pressure»: air pressure tuned for top performance

Based on physical studies, the «Defined Air Pressure» technology (DAP) controls air flow and air pressure, ensuring the highest level of vacuuming performance and the best possible noise dampening.

A stable companion: manoeuvrable and hard to tip over

The oval shape and low centre of gravity ensure that the powerhouse manoeuvrable and hard to tip over. The turbine and battery are installed near the base of the vacuum cleaner, with the low centre of gravity ensuring maximum stability.

Sustainably cleaning: optional HEPA 13 filter

When equipped with the HEPA 13 filter, dust and bacteria can be filtered even more finely and foreign objects can be removed. This means that the Monovac can even be used in hygiene-sensitive areas, no problem.
