

Product data sheet Reshine Sport

v 01 / 14/10/2020

wetrok[®]

Wetrok Reshine Sport

Floor cleaner / resin remover

Recommended dosage (in cold water):

Maintenance cleaning

0.2–0.5 l / 10 l

Basic cleaning

0.5–1.0 l / 10 l

Benefits:

Highly effective DIN 18032-certified basic cleaner and maintenance cleaner for gymnasiums. Optimised for the removal of all types of handball adhesives.

Does not affect the field markings. For use in single or two-step scrubber-dryer processes.

Application:

For basic cleaning and maintenance cleaning of washable, solvent- and alkali-resistant surfaces and floor coverings in gymnasiums.

Good to know:

Wetrok Reshine Sport removes both water-soluble adhesives and natural tree resins.

For heavy soiling increase dosage to max. 10% and/or opt for 2-step scrub drying. (Contact time: at least 3 minutes. **Important:** surface must be kept wet during contact time)

Alternatively, stubborn adhesive residues can be manually sprayed with Reshine Sport 10% in advance and then removed with one-step scrub drying.

Properties:

Low lather

Slightly alkaline

Lightly scented

pH value of concentrate:

Key ingredients:

Surfactants, soap, solvents, fragrances

Storage/Shelf life:

Store in original container in a cool, well-ventilated place. Protect from frost.

Keep container closed when not in use. Shelf life (unopened): 24 months.

Recommended application methods:

Scrub drying

Pour cleaning solution into the fresh water tank. Remove any loose dirt.

Scrub dry the floor covering with a scrubber-dryer and a suitable pad/brush in a single or two-step process.

Highly effective DIN 18032-certified basic cleaner and maintenance cleaner for gymnasiums. Optimised for the removal of all types of handball adhesives. **Application for maintenance cleaning:** direct scrub drying with a dosage of 2–5%. Pre-wet any heavy resin soiling and allow the product to take effect for approximately 5 minutes. **Application for basic cleaning:** indirect scrub drying. Apply the solution with a dosage of 5–10% and allow to take effect for 5–10 minutes. **Important:** floor must be kept wet during contact time. Suitable for all water-resistant, non-coated floors. **Please note:** for professional use only.
